EPOXY FLOORING, LIFTS, CABINETS & ACCESSORIES

perfect irrational spaces

Epoxy Solutions

Turn your garage into something enduringly irrational!

Combine ambitious aesthetics, durability and seamless storage into one space

LIFTS

Do you have limited space? Do you have more than one "toy" you want to show off? Do you like working on your car yourself? Alto Boston has your solution. Automotive lifts are a great way to solve all your problems. Alto can easily install an automobile lift in your garage. They are a great way for you to save space by lifting one car high and parking the other one underneath, or working underneath your car with ease.

CABINETS & ACCESSORIES

CABINETS

Storage and organization is the key to bringing your space to the next level, making it functional and aesthetically pleasing. Alto Boston has solutions to all your storage and organization needs. Our commercial grade cabinets are beautiful and functional. Their high-end design does not sacrifice practicality and quality. Our team is focused on understanding your needs and producing optical harmony in every space. Whether you are looking to add to a residential garage or a commercial space, it will be transformed by our superior craftsmanship, expert installation & futuristic design.

ACCESSORIES

Enhance your space with our organizers. They are simple, easy to operate and convenient. The slat walls will make your life a breeze and your garage beautiful. Hang your bikes, yard tools or even sporting equipment, all while having more than enough room for your favorite "toy," making your ordinary space into a perfect irrational space.

TILE FLOORS

If you prefer the look of tiles, interlocking floor tiles are another great product. Alto Boston also installs interlocking PVC floor tiles made here in the USA. They are guaranteed for life, puncture proof, and mold & mildew proof. There are a variety of colors to choose from. You can do one solid color or spice it up and do a checkered pattern. Whatever your preference, interlocking floor tiles are a great finish for your floor. They are easy to clean and can be easily taken apart to clean underneath.

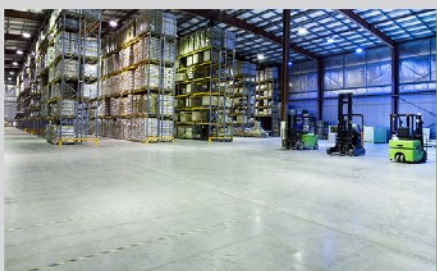

COMMERCIAL / HOME GARAGE

With constant, heavy foot traffic and contaminants such as dirt and rocks brought in on shoes, your commercial or home garage space needs flooring that is not only attractive, but durable and easy to clean. This can be achieved with an Epoxy finish. The extremely hard surface resists wear and tear as well as abrasions keeping your floor beautiful. Another feature of Epoxy flooring is its ability to maintain its original coloring due to the UV-protected top coat which prevents discoloration from the sun, making it low maintenance and ideal for commercial spaces.

INDUSTRIAL

Industrial floors, like those in production and storage facilities and distribution centers, are extremely important. Having a smooth, durable, non-slip floor helps with the ease of movement of all your heavy machinery and equipment, but most importantly, the safety of your employees. Unprotected concrete will eventually start to crack and crumble, making it difficult to move equipment which puts your employees at risk.

RESIDENTIAL

Epoxy floors provide the glamour and durability that may have been initially missing from your garage or other living spaces. Metallic, flakes or clear coat are only a few of the solutions that we offer at Alto Boston. Transforming your garage or other areas into unique living spaces with minimum maintenance, Epoxy is the favorite choice of architects and interior designers for today's homes.

- Stronger than concrete
- Stain resistant
- It can be renewed
- Will not crack or peel
- Easy to clean
- Slip resistant
